

As a U.S. Citizen, I am against this bill that would promote snooping on citizens. I think that once you start doing this for the Internet, what's to stop you from snooping on mail? Perhaps you should enact a law to open letters sent through the Postal Service. So many of our citizens' rights are being eroded away in recent years (DMCA, "Patriot" Act) and this is just one thing I'd like to keep out.
